Fig. 8

A hand-drawn schematic diagram of a device, labeled 400. The diagram shows a central vertical component, labeled 450, which is a long, narrow rectangle. At the top of this component is a small rectangular protrusion, labeled 445. Below this protrusion, the component 450 is divided into two sections by a horizontal line. The upper section is labeled 412, and the lower section is labeled 470. To the right of the central component 450, there are two more rectangular components, labeled 415a and 415b, which are positioned vertically. These components are connected to the central component 450. At the bottom of the central component 450, there is a small rectangular protrusion, labeled 470. The entire device is enclosed in a rectangular frame, labeled 422. The frame has a top edge, a bottom edge, and two vertical side edges. The top edge of the frame is labeled 423. The bottom edge of the frame is labeled 490. The left vertical edge of the frame is labeled 422. The right vertical edge of the frame is labeled 423. The central component 450 is positioned vertically within the frame. The components 415a and 415b are positioned to the right of the central component 450. The components 445 and 470 are positioned at the top and bottom of the central component 450. The components 412 and 470 are positioned in the upper and lower sections of the central component 450. The components 422 and 423 are positioned at the left and right edges of the frame. The components 490 and 423 are positioned at the bottom and top edges of the frame. The components 400 and 423 are positioned at the top and right edges of the frame. The components 422 and 490 are positioned at the left and bottom edges of the frame. The components 412 and 470 are positioned in the upper and lower sections of the central component 450. The components 415a and 415b are positioned to the right of the central component 450. The components 445 and 470 are positioned at the top and bottom of the central component 450. The components 422 and 423 are positioned at the left and right edges of the frame. The components 490 and 423 are positioned at the bottom and top edges of the frame. The components 400 and 423 are positioned at the top and right edges of the frame. The components 422 and 490 are positioned at the left and bottom edges of the frame.
